View Registered Loyalty Card

From this page, you can view all the information customers have entered when registering their loyalty cards. The interface allows you to send **email blasts** to registered customers to promote upcoming events or special offers at your locations. Additionally, all collected customer data can be exported for use in advertising campaigns or other marketing efforts. Customers can register their cards by visiting **www.spyderwash.com** and selecting **Sign Up**, where they enter their information and click **Submit**. Once registered, customers can view their loyalty card balance, recharge a card online using a credit card, and access their transaction history, including promotional activity if promotions are enabled. This functionality helps you grow and maintain a robust customer knowledge base.
